Radiographs

Required Radiographs

1. Presurgical panograph or a full-mouth radiographic series.

2. Post-surgical (within one week of surgery) panograph or a post-surgical periapical radiograph for a single-tooth-implant.

3. Post-prosthetic (with prosthesis or bar superstructure in place); either panographic or periapical radiographs are acceptable.

4. Completed case radiograph (taken within 12 months of the candidate’s oral/case examination date.)

For grafting cases, two additional radiographs are required:

5. Cross sectional cone beam radiograph of the augmentation site before the augmentation’s placement and

6. Cross sectional cone beam radiograph of the augmentation site after the augmentation’s placement.
Candidate number: AF1204
Patient: MC
Case Type: Single Tooth
Presurgical View

Date Radiograph was taken: 03/01/2014
Date Radiograph was taken:  {04/15/2014}
Post-Prosthetic View

Date Radiograph was taken: {08/21/2014}
Completed case radiograph (taken within 12 months of the candidate’s oral/case examination date.)

Date Radiograph was taken:  {10/09/2015}
