ULI Beijing Property Tour @ Wangjing SOHO

On the 24th July, 2014, more than 40 people came together with Beijing ULI Young Leaders Group for a property tour of the Wangjing SOHO project led by representatives of Zaha Hadid – the architect of the project – along with representatives of SOHO China.

Our group had the pleasure of learning about the development’s design, construction, financing, materials and master planning as well as having the opportunity to learn from the architectural team first-hand about the intent behind the details of the project, including landscaping, lighting and interior design. The building design and construction is in accordance with the U.S. Green Building LEED certifications, to make it an air purified, energy & water efficient and intelligent building. The tallest tower in the Wangjing SOHO development, which is 200 meters high, will be owned and operated by SOHO.
